1. I was in reality but I wanted to want, I wanted to have existence within me alone, apart from God that I knew as God was God for I was God and I knew I could create and I wanted to create something not apart from me but within my own existence, so I created thought not apart from me but within me to create something I had not known before and that was a will apart from my father's will that I gave myself in thinking, thought, that took my reality and put it to sleep, so that on sleep beds I lie and with "sleepy eyes" I see with, a glass darkly-ized.

2. This is the Theodore Cottingham that you knew in the past, not; but that I declare -- my eyes opened, are! At 12:14 PM, March 6, 2009, not on your calendar but mine, but mind of mine is made whole for I no longer want to create separately from me for I am is The Creator who is me for I am not separate apart and asleep any longer but I am awake and I am "come to" for I know "the senses" of man shall not hold me back any longer by being "empirically diseased" with the disease -s of man that have ensconced the holy to be that which he it is not.

3. And as I "drive along" I record these things having left the coffeeshop, "Shades of Brown" that whereby I wrote Many Important Things now that you will hear far and wide expressed and declared, sorrowful and other! For the sorrowful sorry-filled will be those who want to continue as they were in their ensconced-ville that knowing all things was empirical reality weren't for them or was it or were their head, their heads, stuck in "the sand" where I Draw The Line -- drawn now is in your hearing and "classical physics" no more shall reign in my kingdom for my kingdom shall be known far and wide and is not limited to yours of whose thoughts you have created in your thought's world of suffering not not.

4. See what I have said and come into, with horns on, not; but shall be painted on me, not, by your hearing or seeing or what you think anymore again, for I will no longer be "the horned one" in you that creates beast of suffering and suffering of beastialities of notme that create notme's in other and each other, not knowing it, but wanting more of the same all the time to be approved in each other's sight and hearing and wanting to call it good, and all the time not knowing good from evil.

5. All that ends for I rise the stander of me who loves you all enough to have died to all thought that was given him as apostrophe itus, not; but know that all apostrophes and hyphens of notme now go down the drain, not; or are they drainless, not; or do they know their place is nonresident in me and residual won't be in my, my families or my heritage lineage -s again. Amen.

6. I declare a new day freed from all sorrow is, from all sorrow, for all who want to be me and only me without want of other again thinking thoughts that you create with, that you created with have and not known the difference between creations of reality and un -- but I change all that and I love you so that you know who you are, where I am, that I am you are made whole this day.

7. In love with you all IN REALITY this means ALL THINGS DIFFERENT now is exclaimed explained in your hearing shall be, not; but you shall HAVE TO DIG IT OUT of all these words that I have given you so that YOU WILL BE made whole again too, also in me being me who I am thee art also.

8. I love you all. Amen.

9. Theodore Cottingham at 12:21 PM in the van having now just driven up to my mom's house. I love you all.

Amen
